## JUNIOR SOFTWARE ENGINEER

I am a passionate and motivated person who enjoys technology and problem solving. I am able to design, test, and maintain software applications that fulfill the needs of clients and users alike, thanks to a strong foundation in programming languages such as Java, PHP, Visual Basic .NET, and Pega Applications. I am keen to continue learning and improving as a professional in the field of Software Engineering, and I am eager to contribute my talents and enthusiasm to any team with which I work.

### AREAS OF EXPERTISE

- Pega Applications
- Visual Basic .NET
- HTML,CSS,Javascript
- Mysql, SQL
- PHP
- Java
- React-Native
- Jiro, Postman GIT, Github

### PERSONAL SKILLS

- Resourceful
- Flexible
- Time Management
- Dedicated

## PROFESSIONAL EXPERIENCE

### YM Global Technologies

Aug 2022 - Dec 2023

#### Junior Software Engineer

Developed and test Pega Applications also creating a connection between Pega and external application, has exposure in mobile and web development creating application that needed to connect to Pega applications via Connect rules and Rest API ensure that the application is up and running, we test those application via test case and for the API in Postman that ensure the correctness of responses, here's my other job responsibilities during this period below:

- Contributing to both the requirements and technical aspects of any development specification.
- Investigating software problems identified in testing or via Support & providing solutions, also assisting in the resolution of software support issues.
- Familiarity with technical documentation such as high-level design (HLD) and low-level design (LLD) for software applications.
- Design and developed different portals as a user interface. Also, for the data management there are different databases to store user data.
- Uses out-of-the-box pega activities such as "sendsimpleemail" that sends an email to the user.
- Contributed in creating the Notification Logic of the Unavailable Dates
- Developed and Design User Appointment Module
- Creating Activities for Saving a data from case processing
- Contributed by creating and design the Queuing for Appointment Schedule
- Worked in a team environment and assisted co-developers.
- Contributing by creating different tables for data storage.
- Create QR Code Scanner
- Generate QR Code Image for Queuing Processes
- Connecting External databases in Pega using driver and driver class
- Experience in RDB Methods
- Test API Responses via Postman
- Create Manual Test Case for module that assigned

## EDUCATION & CERTIFICATIONS

### Bachelor of Science in Information Technology

Quezon City University  
2018 - 2022

### Pega Certified Senior System Architect v8.8

April 2023

### Pega Certified System Architect v8.7

December 2022
